Summary

I am a Full Stack Developer with hands-on experience building scalable web and system-level applications using technologies like React, Node.js, REST APIs, and SEO optimization techniques. I have worked on real-world projects under tight deadlines, developing full-stack platforms as well as security-focused tools such as SEVE. I am also recognized as an **AWS AIdeas Global Champion** for building innovative AI-driven solutions.

EDUCATION

Thakur College of Engineering and Technology
Bachelor of Engineering in Computer Engineering

Aug 2023 – Jun 2027
CGPA: **8.88/10**

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, C, C++

Frameworks & Libraries: React.js, Node.js, Express.js, Django, Bootstrap

Databases: MySQL, MongoDB, Firebase

Developer Tools: Git, GitHub, VS Code, Postman, Vercel

Cloud Technologies: AWS, GCP

PROJECTS

ASET – Academy Safety & Evidencing Truth — Python, NLP, AI, REST APIs Jan 2025 – Jun 2026

- Won **AWS AIdeas Global Champion** title among **10,000+ global submissions** by architecting an AI-driven scientific misinformation detection platform.
- Engineered a research verification engine indexing and querying **1.2M+ research papers**, reducing manual literature review time through optimized evidence-retrieval pipelines.
- Built NLP-based claim verification modules that automatically validate research claims and surface evidence-backed results, cutting manual analysis effort across the pipeline.

SEVE – Secure Erase Verification Engine — C++, Python, Kotlin

Aug 2025 – Jan 2026

- Engineered a Windows security utility capable of scanning and securely erasing **1,000+ system files per session** through automated detection workflows, earning **1st Prize at KnowCode Hackathon**.
- Implemented multi-pass overwrite algorithms and integrated file sanitization, malware scanning, and real-time monitoring to minimize unauthorized recovery of deleted sensitive files.
- Built an Android privacy-monitoring application that detects background camera and microphone access across installed applications, improving user privacy visibility.

DesktopPilot – AI-Powered Windows Desktop Assistant — Python, AI Agents, NLP

Jun 2026 – Present

- Developed an AI desktop assistant that converts natural language commands into executable system workflows, improving task completion speed for repetitive desktop operations.
- Designed an intelligent planning engine supporting **20+ desktop automation operations** spanning application, file, and browser management.
- Automated application launching, browser workflows, file management, and development environment setup, integrating AI agents with system-level controls to boost user productivity.

EXPERIENCE

NavRasa IT Solutions, Jaipur – Full Stack Developer Intern

Nov 2025 – Jan 2026

- Delivered backend architecture for the Gear Gains investment platform, enabling secure authentication, transaction processing, and payout workflows for end users.
- Designed and implemented **15+ REST API endpoints** to support investment management and financial operations, improving backend service coverage for the platform.
- Integrated the Razorpay payment gateway with secure transaction validation and robust authentication/API-validation layers, reducing payment-verification errors and improving system reliability.

ACHIEVEMENTS

- Selected as **AWS AIdeas Global Champion** among **10,000+ submissions globally**, winning a **\$25,000 cash prize + \$5,000 AWS credits** for Project ASET.
- Won **1st Prize at KnowCode Hackathon**, receiving a **50,000 cash prize** for developing SEVE, a secure data-erasure solution.
- Selected as a **Top 12 national finalist** at **IIT Delhi BECON'26 Blueprint** competition.

CERTIFICATIONS

- NPTEL Machine Learning Certification
- GeeksforGeeks 160 Days Problem Solving Challenge (DSA)
